Our commitment to

Cultural Safety

Morella Community Centre is committed to providing a safe environment for all that participate in the centre, which is further detailed in our Organisational Code of Behaviour. This includes providing a culturally safe environment for the facilitators we engage to deliver sessions. It is important to us that where individuals are sharing their own lived experiences they can do so without increasing unnecessary personal risk to them. We respect that everyone comes with different perspectives and encourage people to actively participate, including asking lots of questions in sessions. Behaviours like tone policing, whitesplaining and minimising or discounting facilitators lived experiences can have a negative impact on facilitators and/or participants. If this does occur we retain the right to ask people to refrain and/or leave the session.
